

MullToa 10

- Semi Automatic
- Closed-system Waterless Composting Toilet
- No Drain or Water Required
- Perfect for Cabin, Workshop or Pool cabana
- 3 - 4 people part time use
- Convenient Seat Height 19½in (50 cm)
- Quiet Operation
- Economical Hydro Consumption (250W)
- Easily Installed

The closed-system Mulltoa 10 Waterless Composting Toilet has all the basics for good composting. Similar in size to the MullToa 45, the Mulltoa 10 is without an automatic mixer motor. This economy model has a manual mixer. Sitting on the toilet seat opens the trap doors; after each use just turn the “T” handle on top a couple of times and your compost is mixed and aerated. Once a week or as needed, mulch is added through the toilet seat opening. That is it!

Without any water or drain to connect, the Mulltoa 10 accelerates the natural decomposition process and evaporates excess moisture. Material in the upper chamber is finished in the lower chamber and eventually emptied into a garden composter. Under vacation use the finished compost is emptied only once or twice a year!

Using efficient Swedish technology electrical consumption is very low. The MullToa 10 uses approximately 50 watts per person per hour (averaged over a 24 hour period). When you are away for more than two days, just shut it off! It does not use any electricity when you are away.

The MullToa 10 does not require space under the building as the whole unit is “above floor” and is easily installed in about 3 hours.

The MullToa 10 comes with Mulch, a standard vent installation kit (approximately 8 ft interior vent pipe, 4 ft exterior vent pipe, insulation, roof flashing, insect netting), and manual mixing rake.

Additional Vent pipe, 45° Elbows and Mulch are available separately.

Specifications & Measurements

Capacity (based on 5 toilet uses/person/day): 3 - 4 people part time (up to 5 days in a row)

MullToa10 dimensions: H 26in x W 22in x D 30in (H 66cm x W 55cm x D 74cm)

Floor space required (to allow compost tray to be emptied): W 22in x D 44in (W55cm x 110cm)

Seat height: 19.5in (50 cm)

Electrical Requirements: 120V, 60Hz, 310W max

Shipping Information/Toilet Carton: D 30in x W 25in x H 26in; 80lb

Why a MullToa 10 Over Another MullToa?

Vacation Home or sporadic use by 1 or more person (Up to 4 people part time). Not suitable in a residential location. Ideal in workshop, barn, bunkie, guest cabin, pool cabana, etc.
