

MullToa 55

- Fully Automatic
- Closed-system Waterless Composting Toilet
- No Drain or Water Required
- Perfect for Home or Cottage
- 3 people full time use
- 4 people part time use
- Convenient Seat Height 19½in (50 cm)
- Quiet Operation
- Economical Hydro Consumption (310W)
- Easily Installed
- LED Maintenance Indicator

The closed-system MullToa 55 Waterless Composting Toilet is a fully automatic toilet that anticipates your every move! Sitting on the toilet seat or lifting the toilet seat opens the trap doors; closing the toilet seat lid after each use activates the stainless steel mixing mechanism that efficiently breaks down paper and distributes moisture into the compost material in the upper chamber. LED indicator lamps let you know when to empty the tray. Once a week or as needed, mulch is added through the toilet seat opening. That is it!

Without any water or drain to connect, the MullToa 55 accelerates the natural decomposition process and evaporates excess moisture. Material in the upper chamber is finished in the lower chamber and eventually emptied. Under full time residential use the finished compost is emptied four to five times a year. Under vacation use only once or twice a year!

Using efficient Swedish technology electrical consumption is very low. When at Home or at the Cottage the MullToa 55 uses approximately 64 watts per person per hour (averaged over a 24 hour period). When you are away for more than two days, just shut it off! It does not use any electricity when you are away. The MullToa 55 does not require space under the building as the whole unit is “above floor” and is easily installed in about 3 hours.

The MullToa 55 comes with Mulch, a standard vent installation kit (approximately 8 ft interior vent pipe, 4 ft exterior vent pipe, insulation, roof flashing, insect netting), and manual mixing rake. *Additional Vent pipe, 45° Elbows and Mulch are available separately.*

Specifications & Measurements

Capacity (based on 5 toilet uses/person/day): 3 people full time, 4 people part time (up to 5 days in a row)

MullToa 55 Dimensions: H 26in x W 22in x D 28in (H 66cm x W 55cm x D 71cm)

Floor space required (to allow compost tray to be emptied): W 22in x D 44in (W55cm x 110cm) Seat height: 19.5in (50 cm)

Electrical Requirements: 120V, 60Hz, 310W max Shipping Information/Toilet Carton: D 30in x W 23in x H 27in ; 80lb

Why a MullToa 55 Over Another MullToa?

Residential or Vacation Home use by 1 or more person (Up to 4 people part time).
